Education

Udacity   **2018**
Frontend Developer Nanodegree
https://bit.ly/frontend-nd

Al-Hudaibiyah High School   **Makkah, SA**
2014

Experience

Marn   Remote
Frontend Developer   Jan 2021 – Present

- Designed and implemented the frontend application architecture, focusing on scalability and maintainability.
- Developed reusable and optimized UI components using ReactJS.
- Built cross-platform applications with Flutter, ensuring compatibility and consistency across devices.
- Translated UI/UX designs and wireframes into functional and responsive frontend interfaces.
- Integrated backend APIs with the user interface (UI).
- Ensured code quality and consistency through version control and code reviews using Git.
- Led frontend development projects, overseeing implementation and delivery within timelines.
- Automated web application deployment to development and production environments using CI/CD pipelines.
- Managed web application deployment on platforms such as AWS and Netlify.

Pawkit   Freelance
Frontend Developer   Mar 2024 – Sep 2024

- Designed and implemented the mobile application architecture, ensuring scalability and maintainability.
- Developed reusable and optimized UI components using React Native.
- Built and deployed cross-platform mobile applications for Android and iOS using React Native Expo.
- Converted UI/UX designs and wireframes into fully functional and responsive mobile interfaces.
- Integrated backend APIs with the user interface (UI).
- Ensured and maintained code quality through version control and best practices using Git.
- Deployed mobile applications to the Google Play Store and Apple App Store using Expo EAS.

R/GA   On-Site, Remote
Software Engineer   Jun 2020 – Aug 2021

- Converted UI/UX designs and wireframes into functional, responsive, and accessible web pages.
- Collaborated on backend performance optimization, identifying and addressing bottlenecks.
- Developed static web pages using private tools, Gatsby, a private CMS platform, and Contentful.
- Worked on projects for the Google APAC region, including "Grow with Google," developing web pages.
- Implemented animations using libraries such as GreenSock, Lottie, and React Spring.

Proa   On-Site
Frontend Developer   Jun 2019 – Dec 2019

- Developed a web admin dashboard using React.
- Integrated backend APIs with the user interface (UI) for seamless data interaction.
- Integrated the Google Maps API to enable location-based functionality.

Udacity   On-Site
Project Reviewer   Jun 2019 – Dec 2019

- Reviewed students projects of Frontend Developer Nanodegree program
- Helped students improve their Frontend development skills through code review.

Skills & Interests

Technical:
- JavaScript, TypeScript/HTML/CSS
- Librarie: ReactJs, Node.js, Angular, GreenSock animation, TailwindCSS
- Mobile Development: React Native, Flutter
- Git
- Python
- Dart

Language:
- Arabic - Native
- English - Advanced
- Indonesian - Intermediate
